DID YOU KNOW...?

- Alligators typically have between 74 and 80 teeth. These teeth are sharp and conical in shape, allowing alligators to tear and grip their prey. Alligators continuously lose and replace their teeth throughout their lives, with some estimates suggesting they may go through as many as 2,000 to 3,000 teeth in their lifetime.
- Manatees are known as "sea cows" because they are large, gentle herbivores that eat aquatic plants and spend most of their time grazing.

- A watermelon is both a fruit and a vegetable and 92% water!

LOCAL FLAVOR

- Florida oranges are actually born green because of the Florida nights. The peel can stay green even when the orange is fully ripe.
- Key lime pie was invented out of necessity in the Florida Keys due to the lack of refrigeration and fresh milk in the 19th century.
